

Calico Dolls are used with patients, allowing them to colour-in and make unique to themselves, their illness or condition and allows them to express feelings of being in hospital. Hospital staff aim to prepare children for invasive procedures (such as cannulation) which can be mirrored on their calico doll thereby empowering them to know step by step what will happen. They can also become the nurse or doctor with their calico doll.
(These calico dolls can have a carry bag as well as clothes to fit. The instructions for these are also available).

Material:
Cotton in colours to suit various skin tones

Size:
35cm height x 24cm length
(Can give or take a couple centimetres)

Instructions:
Sew 1cm seam – leaving gap down side of leg.
